Transmittal No. 25-75

**Denmark – Integrated Battle Command System with Indirect
Fire Protection Capability**

WASHINGTON, December 05, 2025 - The State Department has made a determination approving a possible Foreign Military Sale to the Government of Denmark of Integrated Battle Command System with Indirect Fire Protection Capability and related equipment for an estimated cost of \$3.0 billion. The Defense Security Cooperation Agency delivered the required certification notifying Congress.

The Government of Denmark has requested to buy twenty-four (24) All Up Round Magazine (AUR-M); eight (8) Indirect Fire Protection Capability Increment 2 launchers; two (2) Sentinel A4 radars and Integrated Battle Command System (IBCS); two (2) IBCS Engagement Operations Centers; two (2) IBCS Integrated Collaborative Environments; and six (6) IBCS Integrated Fire Control Network relays. The following non-Major Defense Equipment items will also be included: reload vehicles; communications equipment, including, but not limited to, AN/PSN-13A Defense Advanced Global Positioning System receivers, AN/PYQ-10A Simple Key Loaders, AN/VRC-92F radio sets, RT-1523F receiver-transmitters, AN/TPX-61 interrogator set, AN/TPX-57A(V)1 Identification Friend or Foe (IFF) devices, KG-250X Inline Network Encryptors, and KIV-77 encryptors; tools and test equipment; support equipment; generators; publications and technical documentation; training equipment, including the Air Defense Reconfigurable Trainer; spare and repair parts; personnel training; Technical Assistance Field Team support; U.S. Government and contractor technical, engineering, and logistics support services; Systems Integration and Checkout; field office support; and other related elements of logistics and program support. The estimated total program cost is \$3.0 billion.

This proposed sale will support the foreign policy and national security objectives of the United States by improving the security of a NATO Ally that is an important force for political stability and economic progress in Europe.

The proposed sale will improve Denmark's capability to meet current and future threats and enhance its interoperability with U.S. and other allied forces. It will also enhance Denmark's medium and long-range ground-based air defense capability. Denmark will have no difficulty absorbing this equipment and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors will be RTX Corporation, located in Arlington, VA; Lockheed-Martin, located in Syracuse, NY; Leidos Inc., located in Reston, VA; and Northrop Grumman, located in Falls Church, VA. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will require 9-14 U.S. Government and 12-17 contractor representatives to travel to Denmark for up to seven years for equipment fielding, system checkout, training, and technical and logistics support.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

The description and dollar value are for the highest estimated quantity and dollar value based on initial requirements. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Under Secretary of State for Arms Control and International Security, Political-Military Affairs Outreach, at T_Outreach_PM@state.gov.
